

Before the FEDERAL COMMUNICATIONS COMMISSION  
Washington, DC 20554

In the Matter of 2002 Biennial Regulatory Review -  
Review of the Commission's Broadcast Ownership Rules  
and Other Rules Adopted Pursuant to Section 202  
of the Telecommunications Act of 1996,  
Notice of Proposed Rulemaking,  
MM Docket No. 02-277, (rel. Sept. 23, 2002)

To: The Secretary, FCC Commissioners, and Chief, Media Bureau

Ok, another engineer at the bottom, the wireless interneting is catching on, somehow you staff, works which I respect, must know about the impact local wireless networks can have, add to this automatic directional antennae and the range can go some 35 miles. A grant of some 100 meg\$ for training Afganistanian teachers, miy encorporate such technology.

Point? Concentrate on giving the technology to the people on the bottom, through out the globe, concentration on the top might seem attractive for those who are on the top, but won't fly. It's people power. Your job, make it safe so that interferences do not cause tragic accidents and the like.

Best, roger muldavin
